

Instructions in how to use Gammeldags Midi- och Mini Combs.

Both Mini and Midi Combs are made to be hand hold. Mini combs is best for fine wool such as Swedish Fine wool, Rya lambs wool, Swedish Gotland wool and more. Midi combs will do best for longwool and coarse wool.

Note!

The combs teeth are sharp and can harm both small and big hands. Take good care when you use the combs.

*Wash your wool before you start combing
Clean wool is nicer to the combs and more
easy to comb.*

Start teasing the wool (pull the locks apart laterally).

Load one comb. The locks cut end shall point towards the combs handle. Don't take too much wool, half the combs height is enough. Don't press the wool together.

Turn the combs teeth away from you and comb with second comb from top to bottom. Turn the comb with the teeth towards you and comb the other side.

When you have combed the wool it's time to make a top. You can hold the comb like this.
